

Measurement Guide: Rounded Square or Rectangle

Print this guide and bring it with you to measure your hot tub.

What will you need?

1. Measuring Tape
2. Pen or Pencil
3. A Helper (not necessary, but makes measuring easier!)

Quick tips

1. Enter measurements in inches
2. Round up length to nearest inch
3. Measure twice, order once!

i See next page for additional information on how to measure the radius.

Spa Dimensions

Fill in your spa dimensions here. If your hot tub is square, Dimension A and B will be the same.

Dimension A:

_____ inches

Dimension B:

_____ inches

Radius C:

_____ inches **i**

Spa Fold or Hinge

The fold or hinge on a spa cover determines what side you will open the spa cover from. We recommend standing in front of your spa where you want it to open. Think of the fold like a finish line right in front of you. Circle your preferred fold:

Skirt Length

As a rule of thumb, the skirt (or flap) of your cover should be 0.5 inches longer than the acrylic rim of your spa to protect it. Do not include the foam in your measurement. Check off your skirt length:

- | | |
|-------------------------------------|-------------------------------------|
| <input type="checkbox"/> No Skirt | <input type="checkbox"/> 5.5 inches |
| <input type="checkbox"/> 1.5 inches | <input type="checkbox"/> 5 inches |
| <input type="checkbox"/> 2 inches | <input type="checkbox"/> 5.5 inches |
| <input type="checkbox"/> 2.5 inches | <input type="checkbox"/> 6 inches |
| <input type="checkbox"/> 3 inches | <input type="checkbox"/> 6.5 inches |
| <input type="checkbox"/> 3.5 inches | <input type="checkbox"/> 7 inches |
| <input type="checkbox"/> 4 inches | |

How to measure your spa radius:

Firmly place a framing square (or ruler and straight edge) at a 90 degrees around the corner. Measure the length before the curve stops (in the example to the left, the radius would be 7 inches).

Make and model

Take note of your spa/hot tubs make and model. During ordering, you can use these to autofill and check your measurements against our database of measurements.
